About Me

Former Customer Service Professional turned Web Developer. As well as learning web basics at school, I've expanded the following skills below by self-learning. I would like to be in a field that is constantly growing. I'm excited to tackle problems with your team and see the future no one knows yet.

Skills

Languages: Javascript, Typescript, Ruby, Swift, Objective-C, HTML, CSS

Frameworks, Libraries, and Others: Next.js, React.js, Node.js, Sass, Styled Components, Tailwind, Bootstrap, Redux, Redux Toolkit, Socket.io, bcrypt, Rails, SQL, MongoDB, PostgreSQL, Firebase, Git, AWS

Projects

Cookit (Group project) with Next.js, Typescript, Styled Component, MongoDB

Collaborated with one other full stack application in one month for purposes of learning next js and bringing all knowledge of Web. With CRUD functionality, users are able to search recipes and manage its ingredients

Expense Tracker (Group project) with React.js, Typescript, Tailwind, Redux

Collaborated full stack application with one other who is in charge of the backend with Python while I am in charge of all the front end. Users can track expenses/income visually and effectively via graphs framed by Chart.js library.

Book Store with React.js, Typescript, AWS-Amplify

Mini e-commerce application for both owner and customer. Built in 2 weeks for a purpose of learning AWS. Users proceed the purchase by Stripe payment service while a owner adds new items through hidden path and authorisation.
